Quarterly commentary (3rd quarter)

Robin Eagar
(STANLIB)

Fund Review

The Fund outperformed its SWIX benchmark by a tidy margin. The Fund remained fully invested over the quarter. The offshore exposure of the portfolio is just over 23 per cent. The offshore component is invested in equities namely British American Tobacco and the STANLIB High Alpha Global Equity Fund. British American Tobacco makes up 10.6 per cent of the total portfolio. British American Tobacco is a defensive play in a volatile world. The balance of the portfolio is invested in South African assets with 74 per cent invested in South African equities.

One of the star performers during the quarter was the Fund's investment in the New Gold ETF. The global debt crisis coupled to structural increase in the demand for gold plus a weaker South African Rand was positive for the New Gold ETF.

We made some adjustments to the equity portion of the portfolio. We made changes to the Resource exposure of the Fund. We continue to favour the diversified commodity shares over the single commodity stocks. The two resource trades we made were the sale of Exxaro (coal play) into Anglo American and the reduction in the Sasol holding and using its proceeds to increase the Fund's weighting in BHP Billiton. Both Anglo American and BHP Billiton are attractive relative to historical valuations, while Sasol is fully valued given its project pipeline and earnings growth profile.

Our Industrial exposure is 55 per cent of total portfolio equity. We have maintained our large exposure to consumer related shares in the Fund. We are of the opinion that the consumer will be the driver of South Africa economic performance over the next few years. Thus the Fund has large exposure to telecoms, retailers and healthcare. A large portion of the Fund is invested in MTN and Vodacom. Telecoms shares are cash generative with decent dividend payout ratios. Retailing shares such as Woolies, Shoprite and Mr. Price provide the Fund with direct exposure to the South African consumer. Healthcare remains a South African and global theme and the Fund's exposure to Aspen, Life Healthcare and Netcare will provide the necessary exposure to the sector. Financial shares make up 16 per cent of equities. FirstRand and Nedbank remain our preferred banking shares.

Looking Ahead

Going into the 4th quarter 2011, we continue to position the Fund for moderate SA GDP growth that remains consumer driven. The Fund's SA equity holdings target companies that are exposed to the global commodity cycle and the South African consumer. Our commodity exposure is a hedge against continued global volatility and the European debt situation.
